

DuPont Teijin Films will be exhibiting again at the world leading Cartes event at the Paris-Nord Villepinte Exhibition Centre on November 4-6th. In recent years Melinex® films have been established in the market for durable cards in a wide range of applications. “Now offering a complete range of CORE and PROTECT overlay films – including laser engravable overlay - we are looking to build on those successes” says Jonathan Lloyd, European Marketing Manager. “We look forward to welcoming our customers and new enquirers to our stand 4P117 at the exhibition”.
