PRODUCT OF THE YEAR FOR DUPONT TEIJIN FILMS

DuPont Teijin Films has won the 2008 OSIA Product of the Year Award at this year's cintelliq Annual Organic Semiconductor Conference held in Frankfurt, Germany

The award is for the development of PET and PEN substrates which have been central in the development and now commercialisation of the emerging Plastic Electronics (Displays, Photovoltaics, Memory applications etc) industry.

The judges selected DuPont Teijin Films product over the other nominations for this award because it has:-

- Developed innovative solutions to a challenging problem
- Provided a key component that has enabled the commercialisation of early products based on organic electronics
- Made commitment in investment and scale-up in support of a young industry

The Organic Semiconductor Industry Awards (OSIA), sponsored by cintelliq and in association with OSA Direct, are open to all organisations operating in the organic semiconductor and organic electronics industry. The 2008 awards were presented by Craig Cruickshank, CEO of cintelliq and chairman of the awards panel, at the OSC-08 Networking Dinner.

Craig Cruickshank said, "This year's award winners are each playing an important role in the development and commercialising of organic semiconductor technologies. Their efforts will lead to new and exciting applications" He added, "Each of this year's winners have achieved their success through the development of valuable partnerships and collaborations, an encouraging approach to building a new industry that others may be inspired to follow."

Keith Rollins, Global Flexible Displays Market Manager, DuPont Teijin Films received the award, he said "I was proud to accept the award on behalf of DuPont Teijin Films and want to thank all of the DuPont Teijin Films' team involved for their outstanding contributions to all of our substrate development work over recent years and of course to our development partners who are in the forefront of creating the new Plastic Electronics industry" .

Additional Notes to the Editor:

DuPont Teijin Films

DuPont Teijin Films is the world's premier producer of PET and PEN polyester films, specialises in film products and related services for the speciality, industrial, packaging and advanced magnetic media and photo systems, electrical and electronics markets. The company has reported sales of \$1.4 billion and employs about 4,000 people with dedicated marketing, technical and manufacturing operations in every region of the world.

Brand names include Mylar[®], Melinex[®], and Teijin[®] and Teton[®] PET polyester film, and Teonex[®] PEN polyester film. The business includes existing joint ventures with DuPont-Hongji Films Foshan Co., Ltd., in China.

As DuPont Teijin Films offers the broadest portfolio of polyester films of any supplier in the industry and has an unmatched technology platform to continue bringing the most innovative solutions to serve customer needs, it is uniquely positioned to meet the requirements of markets ranging from packaging to industrial, electronics and specialities.

Because DuPont Teijin Films seeks to grow and evolve in a way that justifies the trust of its shareholders, customers and the public at large, the highest priority is placed on safety and the preservation of our natural environment.

DuPont Teijin Films is a 50:50 joint venture between DuPont and Teijin Limited. DuPont is a science company. Founded in 1802, DuPont puts science to work by solving problems and creating solutions that make people's lives better, safer and easier. Operating in more than 70 countries, the company offers a wide range of products and services to markets including agriculture, nutrition, electronics, communications, safety and protection, home and construction, transportation and apparel. Teijin Limited is a major multinational enterprise offering fibres, chemicals and plastics, pharmaceuticals and medical products and diversified products. Teijin is using its proprietary technologies to expand into areas such as health-care products and services, advanced materials and information media.
